

Terms and Conditions

Conditions for access to and use of the myDewetra portal

Last updated: 20 July 2026

Introduction

These Terms and Conditions constitute a legally binding agreement between the User and the Department of Civil Protection - Presidency of the Council of Ministers (the “DPC”), jointly with Fondazione CIMA (the “CIMA”), concerning access to and use of the myDEWETRA Portal (<https://www.mydewetra.org>, the “Portal”) installation of the Department of Civil Protection, as well as any other related or connected module, multimedia channel, website or mobile application.

By accessing the Portal, the User declares that they have read, understood and accepted these Terms of Service, which govern its use.

In particular, the User acknowledges that:

the Portal is a complex system used by the DPC Central Functional Centre for real-time forecasting, warning and monitoring of the Italian national territory;

the Portal is made available to the network of Decentralized Functional Centre, the structures and components of the National Civil Protection Service and other entities (collectively, “Users”), following specific assessment and in compliance with the civil-protection purpose;

the Portal integrates the following sector-specific application services:

- Dewetra: application service made available to all Users to display, in a shared manner, data, models, information and functions for real-time monitoring and assessment of weather-hydrological risks, as well as to promote scientific knowledge and test techniques and methods for Civil Protection.
- FloodCat: application service functioning as the national catalogue of flood events pursuant to Art. 8 of the P.C.M. Directive of 24 February 2015. FloodCat makes data validated by the Regions and other competent authorities available and allows new information on historical flood events to be entered, validated and viewed.
- WebAlert: application service made available to Users (DPC, Functional Centre and Autonomous Provinces) to support the sharing of hydrological and weather assessments and document exchange, and to prepare, in cooperation with the Decentralized Functional Centre of the Regions and Autonomous Provinces, the national criticality/warning bulletin for hydrogeological and hydraulic risks.
- Datalog CFC: application service made available to Users (DPC) to support the collection process, like a daily diary, of all information relating to the activities performed each day by the Central Functional Centre service.
- Export Data: application service made available to Users (DPC) for downloading data observed by the network of ground measurement stations of the Regions/Autonomous Provinces and by the national radar network.
- QPF: application service made available to Users (DPC) to enable the Hydro Sector of the Central Functional Centre (CFC) to carry out rapid assessments of criticalities/warnings for each warning area into which the national territory has been divided, based on forecasts prepared daily by the CFC Weather Sector.
- QSF: application service made available to Users (DPC) for composing the inputs to the Snow Road Conditions Bulletin produced by the Central Functional Centre service.
- myCloud: application service made available to Users (DPC), designed as a HUB for collecting event reports prepared by authoritative entities and, more generally, as an exchange space between the different applications enabled for write access.
- FireAlert (Bulletin): application service made available to Users (DPC) to support forest-fire warning processes and to prepare and distribute the national forest-fire forecast bulletin and public communication documents.
- Propagator: application service made available to Users (DPC and Functional Centre) to support active forest-fire-fighting activities.
- Reporter: application service made available to Users (DPC) to generate Event Reports and rapid summaries of the current and forecast weather-hydrological situation of the Central Functional Centre service.

Eligibility and access

Use of the Portal content is completely free of charge.

Use of the Portal content is granted only after User registration, as identified in the introductory part of this document.

In particular, given the information contained in the Portal applications and their function for the civil-protection system as a whole, use is permitted only to certain categories of parties, which declare, warrant and accept that they:

- provide the necessary registration information truthfully and completely;
- keep that information accurate and update it promptly;
- have legal capacity and are therefore legally able to accept and comply with these Terms and Conditions;
- do not access the Portal by automated or non-human means, including bots, scripts or other tools;
- do not use the Portal for illegal, unauthorized or otherwise commercial purposes;
- do not use the Portal to violate laws or regulations.

If the User provides false, inaccurate, outdated or incomplete information, or fails to comply with the above conditions, DPC, or its delegate, has the right to suspend use of the Portal or, where appropriate, close the User account, and to change the access nickname if it is inappropriate or obscene.

Finally, the User agrees to keep their access password confidential and is responsible for every use of their account.

Ownership rights and use of the Portal

Source code

The myDewetra source code is owned by DPC.

DPC shares intellectual-property ownership of the software source code with CIMA, pursuant to Department Head Decree no. 1149 of 2 April 2015.

Anyone, including the User, may create new derivative works from the software implementing the Portal, based on the published source code, provided that they:

duly cite the source or state that the new work derives from the “Dewetra” code;

publish the new work under the same copyleft license covering the original code, in accordance with European provisions.

The source code is released as open source under the EUPL - European Union Public Licence and is available on GitHub at the following link: <https://github.com/CIMAFoundation/prv-src>.

A version of the source code may also be obtained by sending a request to dewetra@protezionecivile.it.

Any new installations made on the basis of the original source code or modified source code may be called “MyDewetra” or similar only following specific agreements with DPC.

In any event, DPC retains ownership of the intellectual-property rights and every other right not expressly granted under this agreement.

Third-party components

The source code of the myDEWETRA Portal and all applications in the suite may integrate third-party components that are themselves distributed under open-source licences compatible with the EUPL licence.

If the licensee obligations arising from the EUPL licence conflict with those arising from the licences of integrated components, the compatibility clause provides that the obligations prescribed by the compatible licence prevail.

Use of the Portal by the User

Provided that the User acts in compliance with this agreement and applicable law, DPC grants a limited, revocable, non-exclusive, non-assignable and non-transferable account, granting the right to access and use the Portal installation as a “User”.

However, the User may not access or use the Portal through scraping, crawling, spidering or other automated systems capable of accessing, displaying or retrieving data.

Updates to this agreement

DPC reserves the right, at its sole discretion, to make changes or amendments to these Terms and Conditions.

The User is notified of any changes through an update to the “Last updated” date of these Terms of Use, shown at the bottom of the Portal homepage.

The User is responsible for reviewing these Terms of Use periodically in order to remain informed about updates.

Supplementary Terms and Conditions that may be published on the Site for specific applications form an integral part of these Terms and Conditions, even if they are not expressly incorporated.

Related data, information and content

The data, information and content conveyed through the Portal are intended strictly for activities of the Civil Protection Service or for purposes otherwise authorized by DPC.

The Portal is unrelated to any commercial purpose or application, unless otherwise specifically established and authorized by DPC.

By its nature, the Portal also includes content produced by parties other than DPC, under their own license; therefore, DPC is not responsible for third-party works or contributions.

Accordingly, no warranty is provided regarding the accuracy or completeness of content supplied by third parties, or its availability.

In particular, DPC accepts no responsibility for any websites accessible through hyperlinks placed within the Portal. The owners of the websites or pages accessed are responsible for the completeness and accuracy of the information, under the terms they provide.

The User acknowledges that:

- the technical and regulatory documentation and forms available on this site may be downloaded freely;
- the static and dynamic data, information, models and functions of myDewetra, hereinafter collectively referred to as “content”, are made available to Users only for uses strictly related to civil-protection activities, within current projects and agreements with the Department of Civil Protection. In any event, they may not be used in publications or projects in which DPC is not involved, except with DPC specific authorization and direct citation of DPC.

Use of the direct link

Use of a direct link to the Portal, or displaying the Portal link in one's own application or service, is subject to DPC prior authorization, granted under the following conditions:

- the requesting party must notify DPC in advance by email at dewetra@protezionecivile.it, indicating its identification details and the reason for the request;
- the requesting party must send the same address all conditions for publishing the link and all changes relating to its publication, including deletion, amendment or other changes;
- the direct link to the Portal must not cause the User confusion regarding ownership of the content, the activities of the party providing the direct link and the services offered by the Portal;
- the link must be implemented so that it connects directly to the first page, where these Terms and Conditions, the privacy policy and the cookie policy are visible, readable and unambiguous.

Deep linking, inline linking and framing practices are prohibited in all cases.

DPC may revoke this authorization at any time if the agreed purpose, the above procedure or legal provisions are not respected.

In any event, creating a link to the Portal constitutes full acceptance of these rules.

Copyright in the content

Content available on the Portal is protected under applicable copyright legislation (Law no. 633/1941, as amended) and intellectual-property law.

Content may be released under copyright with rights reserved.

Reproduction, communication or dissemination of such content is prohibited without the express authorization of the holder of the rights in that content.

Warranties

Given the complexity of the Portal and the heterogeneous nature of the data it contains, DPC does not guarantee that the Portal will operate without errors or interruptions at all times, including in light of possible ordinary or extraordinary maintenance interventions.

Therefore, except as expressly provided in this agreement and to the maximum extent permitted by applicable law, DPC gives no express or implied warranty that the Portal will operate continuously and without interruption.

If service suspension is caused by planned maintenance requirements, DPC or its delegate will provide the User with reasonable advance notice of the duration of the service interruption.

If service suspension is instead caused by unforeseen or unforeseeable circumstances, DPC or its delegate will inform the User of the temporary unavailability of the Portal and restore operation as soon as possible, in any event no later than 24 hours thereafter, unless the malfunction is so serious as to require a longer suspension, which will be communicated to the User by email as soon as possible.

Communications

To send any communication, complaint or suggestion concerning the Portal or these Terms and Conditions, the User must contact DPC directly at the following email address: dewetra@protezionecivile.it.

Withdrawal

This agreement remains in force until superseded by an update or amendment introduced as provided above.

DPC may withdraw unilaterally from this agreement at any time, without notice and without cost or charge, and terminate the functionality of the Portal and the provision of application services.

Similarly, the User may stop using the Portal at any time and without notice by expressly requesting, through the prescribed procedures, that their access credentials be disabled.

Assignment

DPC may assign, in whole or in part, this agreement and the rights and obligations arising from it to third parties at any time and without specific consent from the User.

Validity of contractual provisions

If any provision of this agreement, or part of it, is held by a judicial authority to be void, voidable, invalid or ineffective, that provision or part shall be directly modified, reinterpreted or supplemented according to its literal meaning, to the extent necessary for it to be lawful and fully valid and effective.

Failure to exercise rights

Failure, delay or partial exercise by DPC of any rights or remedies arising under this agreement or by law does not prejudice or constitute a waiver of that right or remedy, or of its full exercise.

Agreement language, applicable law and jurisdiction

DPC may, at its discretion, make this document available in a language other than Italian. The User, having been informed of this possibility, acknowledges and accepts it.

However, no change to this agreement is made by one language version compared with another.

This agreement is governed by Italian law.

The Court of Rome, Italy, has exclusive jurisdiction over any dispute arising from this agreement.
